What's New In?

MailWatch is a "Pull Voice Mail" system to help you manage your voice messages at home. Current version: V4.2 Known issues: MailWatch has many known issues, some of them are listed below. Fixed 1. While "pull voice mail" function is active, all incoming/outgoing calls will be connected to the "MailWatch" system. Updated 1. Language Pack. New 1. Exiting the "MailWatch" system, and then re-entering the system will allow you to back out of your "MailWatch" system. ## MailWatch V4.2 Setup Guide Preparation Download MailWatch V4.2.exe: After downloading, open the downloaded file and run it. You will be asked to enter the email address and password you wish to use, then click "OK". 1. Select "Add New User" and enter the desired username and password. 2. Enter your email address and leave blank the Password field. 3. Click on "Add New User" then wait until the system has finished adding your new user. 4. You should now see a "User has been created" message. 5. Click on "OK" to continue. You will be prompted to enter the System Password, which you will use to log into MailWatch V4.2. Your User settings will be saved to the computer (for later use). ## Create New User 1. Click on "My Files" to open the my mail folder. You should see "New Mail" in the lower left corner. 2. Click on "New Mail" to open a new mail window in a new tab. 3. Enter a name for the new user. For example: John Smith (email@gmail.com) Select "Check if MailWatch is already there" to open the MailWatch list. 4. Click on "OK" to continue. You will see "Continue? Yes/No" dialog box. 5. Click on "Yes" to create your new user. After you created your new user, you will be asked to change your settings. If you already have a mail program on your computer, MailWatch will use the same program. If you don't have a mail program, MailWatch will create a program for you to manage your messages and files. ## Change MailSettings 1. Click on the "My Files" icon on the top left corner of the MailWatch window. You should see "New Mail" in the lower left corner. 2. Click on "New Mail" to open a new mail window in a new
