Trim Work Area [March-2022]

Trim Work Area is a simple utility that allows you to trim from the Left, Top,Right and Bottom of the desktop work area by a number of pixels using ini file settings. This only effects the area used when a window is maximized. It doesn't keep applications from moving into the margin area. You may find it useful especially if you use toolbars that auto hide, or if you have your taskbar set to auto hide. Today we will see how to add and remove shortcuts from the desktop on any user created page using the Page Manager control. This is a really simple one but it is often a common question so lets start Adding a shortcut On any page in the Page Manager control click on the Page Properties button. Then click on the page tab and in the desktop section click on the Add button Name your shortcut anything you like I used chrome on the left and the printer icon on the right in the image Optionally set the Always On Top/Top Left/Top Right/Bottom Right/Left etc I left this on auto Finally Click Save This should open the desktop and you should see a copy of the shortcut and the Page Properties button Go back to the main screen and click on the Edit button When you are on the screen to add or remove a shortcut it will look like the below image Remove a shortcut You can remove any shortcut by clicking on the Delete button from the above screen. Conclusion This is a really simple one but it is often a common question so lets start Adding a shortcut On any page in the Page Manager control click on the Page Properties button. Then click on the page tab and in the desktop section click on the Add button Name your shortcut anything you like I used chrome on the left and the printer icon on the right in the image Optionally set the Always On Top/Top Left/Top Right/Bottom Right/Left etc I left this on auto Finally Click Save This should open the desktop and you should see a copy of the shortcut and the Page Properties button Go back to the main screen and click on the Edit button When you are on the screen to add or remove a shortcut it will look like the below image Remove a shortcut You can remove any shortcut by clicking on the Delete button from the above screen. There are a few small changes with Internet Explorer 11 and page readers. One b7e8fdf5c8

What's New In?

=== You can specify trim values using this tool. Choose the area of desk top that you want to trim. - Left Trim: specify the pixel offset of the left side of the top area of the desktop work area. - Right Trim: specify the pixel offset of the right side of the top area of the desktop work area. - Top Trim: specify the pixel offset of the top of the top area of the desktop work area. - Bottom Trim: specify the pixel offset of the bottom of the top area of the desktop work area. - Cut Specifies the trim of the top area of the desktop work area. - Restore Restore the work area to the size it was after you trimmed it. - Abort Aborts the current trim operation without changing the trim values. - Configuration Help This is the main configuration window for Trim Work Area. This window is the only window you will see when you use the tool with no preference file. This window has the following fields to configure: - Name: The name of the window for this program. - Help Button: This is only shown if there are no preference files in the folder. - Work Area: Defines where the trims are made. - Folders: The folders you wish to trim. This is the only one you can have on by default. - Preferences Path: The path to the preferences.ini file on your computer. - Exe Path: The path to your trim work area exe file. - [Left/Top/Right/Bottom] Trims: These are the offsets you wish to trim the work area by. - Trim Width: The size of the trimming area (must be a number between 1 and 150). This is only for the first folder. - [Left/Top/Right/Bottom] Trims: These are the offsets you wish to trim the work area by for the second folder. - [Left/Top/Right/Bottom] Trims: These are the offsets you wish to trim the work area by for the third folder. You can easily resize each of these sections using the Minimize, Maximize and Restore buttons at the bottom of the window. Trim Work Area Features: === - Trim from the Left, Top, Right and Bottom of your desktop work area by a number of pixels. - Optionally trim your desktop work
