Answers can be static (e.g., "The answer is 5"), "one-click" animations (e.g., "The surface area of the planet Mercury is 30.05 km²"), graphs (e.g., "The left-hand graph shows the U.S. unemployment rate since the early 1970s. The right-hand one shows the U.S. unemployment rate as a function of the rate of inflation since the early 1970s"), or a combination of static and animations (e.g., "The area of a rectangle whose base is 4 feet and whose height is 5 feet is"). Wolfram|Alpha also supports queries with complicated logic (e.g., "The intersection of a conic and a parabola
